#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-13 and 15-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Husson et al US Patent 5,919,235.

Husson et al discloses an intervertebral implant (S) comprising a longitudinal flexible body that can be wound in a spiral shape (see Figs. 3 and 2) with a first exterior end (5), a second interior end (3), a longitudinal axis and a cross section of the object which is orthogonal towards the central axis is reduced in size towards the second interior end (the Examiner interpreted element 2 as the reduced part of the implant because the applicant's representative has not disclose that the distal tip end of the second interior end of the implant is also continuously reduced in size).

Regarding claim 5, see Fig. 1 from element structure 3 to element structure 2 the width is reduced continuously.

Regarding claim 6, the width showing in the area of element structure 5 is half the width of element structure 3.

Regarding claims 7, 8 and 11, see Fig. 2A.

Regarding claims 9 and 10, the Husson et al reference is silent regarding the gap between the spirals. However, Husson et al does not specifically, disclose the exact gap width between

Art Unit: 3738

the spirals but it would be an inherent characteristics of the gap of the Husson et al reference to have the width of claims 9 and 10.

Regarding claim 13, a comparison of the recited process with the prior art processes does NOT serve to resolve the issue concerning patentability of the product. In re Fessman, 489 F2d 742, 180 U.S.P.Q. 324 (CCPA 1974). Whether a product is patentable depends on whether it is known in the art or it is obvious, and is not governed by whether the process by which it is made is patentable. In re Klug, 333 F2d 905, 142 U.S.P.Q. 161 (CCPA 1964). In an ex parte case, product-by-process claims are not construed as being limited to the product formed by the specific process recited. In re Hirao et al., 535 F2d 67, 190 U.S.P.Q. 15, *see footnote 3* (CCPA 1976).

Regarding claims 16 and 17, see col. 5, lines 22-27.

#### ***Allowable Subject Matter***

Claim 14 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Conclusion***
